Features & Benefits

Brewers Grains are a very palatable moist feed with useful protein content. They have a good fibre content making them useful to use as a forage extender when fed at high levels if forage is short or expensive. When fed at lower feeding rates they still make a very cost effective protein contribution to most diets. They have all year availability from numerous breweries located in Ireland.

Feed Advice

Cattle	Up to 15 kgs/head/day
Sheep & Goats	Up to 3 kgs/head/day

Delivery

Brewers Grains are delivered in bulk tipper vehicles.

Handling and storage

Brewers grains should be stored in a clean lined clamp with concrete floor. All clamps should be sheeted & weighted down to exclude air and rain water which will aid shelf life and maintain feeding value.
